

{ Experience }

Senior Software Engineer, *Hillary for America*, Brooklyn, NY

June 2016–November 2016

Software Engineer, *Hillary for America*, Brooklyn, NY

June 2015–May 2016

- Worked to elect Hillary Clinton as the 45th president of the United States
- Fought against the rise of fascism and white nationalism

Lead Engineer, *Pantsuit* // Hillary for America's internal design system

- Created and maintained an internal design system used in dozens of applications by more than 70 engineers and designers
- Led standardization of CSS architecture and standards across products and agile teams
- Collaborated with visual and product design teams to ensure UI consistency
- Documented system for the engineering team to reference as needed

CMS/Storytelling Team // Content-driven products and interactive experiences

- Implemented initial templates and UI for the re-launch of hillaryclinton.com
- Served as accessibility lead for relaunched site; complied recommendations to ensure adherence to WCAG 2.0
- Developed internal content management features to allow content creators flexibility and creativity
- Built various microsites aimed at voter persuasion and understanding the impact of campaign policy
 - **College Calculator**: allowed users to calculate how much money you will save under Hillary Clinton's college plan.
 - **With Her**: featured POTUS, FLOTUS and VPOTUS making the case for Hillary Clinton
 - **Together for America**: showcased Republican and Independent leaders who have stepped forward to support Hillary Clinton

Product Designer & Front-End Developer, *IBM Design*, Austin, TX

January 2015–May 2015

- Served as a liaison between the engineering and design teams on the PureApplication platform (ibm.com/pureapplication), constructing mobile-first web application prototypes
- Quickly prototyped working models and proof of concepts to pave the way for production engineers
- Created curriculum to teach designers basic programming skills

Staff UI Engineer, *Blackhawk Network*, Lewisville, TX

March 2013–December 2014

- Designed and developed business solutions for stable, secure, high-volume web-based applications for notable brands including Facebook, Epson, Canon, Microsoft, and more
- Utilized responsive design and mobile-first principles while maintaining cross-browser/cross-platform compatibility and ensuring accessibility
- Collaborated closely with the marketing team, solutions team, software architects, business analytics and product owners

Contractor, *Moroch / Extra Sauce*, Dallas, TX

September 2012–March 2013

- Worked with creative agencies to develop compelling, usable & beautiful user experiences
- Created of standards compliant, semantic, mobile-friendly interfaces via HTML5 & CSS3
- Designed integration into WordPress & ExpressionEngine content management systems

Founding Chapter Leader, *Girl Develop It – Dallas/Ft. Worth*, Dallas, TX

January 2014–December 2014

- Founded the Dallas Chapter of Girl Develop It through coordination with national headquarters, grassroots marketing, social media outreach and local client-focused networking events
- Developed and maintained partnerships with key community members to support our mission
- Ran the day-to-day operations of chapter including securing space, scheduling classes and vetting teachers
